PATIENT SAFETY CHECKLIST

Am I prepared for each doctor with copies of pertinent medical records, health summary, list of medications, list of symptoms, etc.?
Do I have a list of questions?
Did I research my diagnosis?
Did I ask my doctor if there could be other possible diagnoses?
Do I know my family history?
Do I need to get a second opinion?
Did I follow up on my test results?
Did I ask what my test results mean?
Did I ask for my tests to be repeated?
Do I need to find a doctor affiliated with a highly respected medical school?
Have I enlisted support from loved ones?
Do I need an advocate?
